SpeechiTouch **InfraRed**

The giant Android tablet

designed to simplify your life

Education & Corporate

The SpeechiTouch interactive display is the ideal tool for presenting and sharing documents, videos and other content during both in-person and remote courses or meetings. With this giant tablet, easily switch between digital and physical media, and its hotspot connects all the room to Wi-Fi. Choose the IR range for simplicity at a competitive price.

S-Write - Unlimited learning & collaboration

Present, annotate, import, organise your ideas... It is all at your fingertips with the integrated S-Write whiteboard application. Thanks to the variety of tools it offers, S-Write makes preparing lessons and teaching on a giant touchscreen simple, no matter the subject. Furthermore, this SpeechiTouch interactive display is multi-user making it easy to encourage students to be involved.

Working with **Google**

For Google users, embed a Google-certified Android OPS into your screen. Enjoy the whole Google environment of services and applications (Classroom, Workspace, Drive, Meet, PlayStore...), as well as Microsoft 365 suite, and the related security updates.

Working with **Windows**

Add a Windows OPS PC to your interactive touchscreen for access to your workspace you are used to and all your favorite software. Take interactivity and collaboration even further (with scientific resources, brainstorming, digital signage, visual management, etc.)
